// PROJECT EXPERIENCE

>> Dream Bean

FRONT-END DEVELOPER | DEC 2020

- > Created a responsive coffee shop website using *HTML5*, *CSS3*, *JavaScript*, and *GSAP* animations.
- > Demo: <https://jkas1.github.io/dream-bean/>

>> Travelbook

FRONT-END DEVELOPER | NOV 2020

- > Created a responsive landing page for a travel website using *React* and *Styled Components*.
- > Demo: <https://jkas1-travelbook.netlify.app/>

>> Pot It

FULL STACK DEVELOPER | OCT 2020

- > Created a responsive plant store website with a back-end and front-end server using *Angular*, *Node.js*, and *MySQL*.
- > Demo: <https://pot-it.herokuapp.com/>

>> QTC Medical Record Queuing System

DATABASE LEAD | AUG 2019 - MAY 2020

- > Collaborated with a team using Agile methodology to create a workflow *ASP.NET MVC* application that keeps track of large amounts of medical records for the company QTC.
- > My team improved QTC's work efficiency by replacing their manual record processing system with an automated queuing system that sorts medical records based on priority guidelines.
- > Created *MySQL* stored procedures to insert data into the database and also created the endpoints to call these stored procedures using *C#*.
- > Integrated the database to the UI using the *Entity Framework*, *HTML5*, *CSS3*, and *JavaScript*.

>> EatQuest

ANDROID DEVELOPER | FEB 2019 - MAY 2019

- > Collaborated with a team to create an *Android* app that provides users the nearest restaurants to their location that fit their selected criteria.
- > Implemented the app's ability to get and display the user's current location and display markers of the nearby restaurants surrounding the user's current location using *Java* and *Google APIs* for *Android*.
- > Developed the overall UI design of the app using *HTML5* and *CSS3*.
- > Code: <https://github.com/DanTFree/Eat-Quest/>
